This is the second office action for application number 10/626,641, Tool Suspension Device, filed on July 25, 2003.

Reasons for Allowance

The following is an examiner's statement of reasons for allowance: the primary reasons for the allowance of the claims in this application are the limitations of a tool suspension device including a retaining member mounted on an end face of a mounting portion of a main body and extended into the mounting space of the mounting portion of the main body, wherein the retaining member is a screw, now included in independent claim 1 and in combination with the other elements recited in the claim; and a tool suspension device including a ratchet wrench mounted on the main body and including a distal end provided with an operation stud mounted in the mounting hole of the main body, and a positioning ball protruded outward from a side wall of the operation stud and rested on the catch edge of the mounting hole of the main body, included in independent claim 6 and in combination with the other elements recited in the claim. These combinations of elements are not found in the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
